Quality at the source

We source internationally with on-site quality control and exacting standards to match your precise requirements with perfect products. Our teams in Europe and Asia work directly with manufacturing facilities to vet products, adjust specs, and develop samples for your review.

Flexible Packaging Film

Films and Rolls

BOPP FILM

Size Range: 10 - 40 micron, 8 -87 inch
Packaging: Case Packs / Palletized
Details: Custom Lengths

-  Custom Printing
-  Heat Sealable
-  Green Options

High-performance, versatile BOPP plastic film with excellent machinability, clarity, and sealing properties. For use with a wide range of packaging applications such as food packaging, cigarette packaging, candy wrappers, labels, and adhesive tapes. Can also be used in lamination applications to enhance the appearance and durability of printed materials like magazines, book covers, and brochures.

STRETCH WRAP

Size Range: 10 - 50 micron
Packaging: Case Packs / Palletized
Details: Custom Lengths, Biodegradable Options

-  Green Options

High-performance stretch wrap with high strength and puncture resistant, appropriate for everyday applications. Can be applied using wrapping machines or by hand. Rolls have a continuous sheet of film that is wrapped around the sides of a pallet or bundle to protect the package from dust and moisture, prevent and indicate tampering, and keep items together.

AGRICULTURAL FILM

Size Range: 0.008-0.2mm, 40 -157 inch
Packaging: Floor Loaded/ Palletized
Details: Custom Lengths & Perforations
Biodegradable Options

-  Green Options

Used to protect crops and plants in open fields or greenhouses throughout a grow cycle. These films reduce crop spoilage risk associated with weather, pests, and weeds, and help in improving the overall crop quality.

BOPP FILM

INVEST IN PROFITABLE SUSTAINABILITY

We are proud to offer SOLMERA™ to help save the world from plastic pollution. SOLMERA leverages multiple energy sources such as low thermal temperature as well as UV. This hybrid approach ensures that SOLMERA products can become bio-available, providing a new way to address the persistence of plastics in our environment. While most plastic alternatives can cost four times more than their standard plastic counterparts, SOLMERA products provide the same value and barely raise the price.

[Contact Us](#)

to learn how to integrate SOLMERA with your order.

SOLMERA Means Perishable Plastics

Parity with Plastic

Retains all the capabilities of traditional plastic, without the negative environmental impact.

Minimal Cost Increase

Tiny per-unit increase means environmental impact doesn't require a sacrifice to bottom line.

Use Alongside Recycling

Can go to a recycling center or a landfill—consumers don't need to change a single behavior.

Just Mix It In

An easy mix-in degradation catalyst requires no changes to the factory floor.

Thermally Activated

Uses thermally-activated decomposition and works even when buried in a landfill

Rapid Decomposition

Broken polymer chains are digested by bacteria, leaving behind only water and carbon—not microplastics.

ABOUT

NAUTICAL

MANUFACTURING & SOURCING

WAREHOUSING & FULFILLMENT

CUSTOM KITTING & OVERWRAP

Nautical Manufacturing and Fulfillment was launched in 2017 to bring improved strategy to product manufacturing and fulfillment on a global scale. While many companies manage this work remotely and serve as brokers, Nautical facilitates high-quality services from sourcing to end user with boots on the ground. We put the best brainpower and global networking behind our clients; both those who use our services start-to-finish and those who meet us somewhere in the middle.

Whether you're interested in greater efficiency, higher ROI, or improved client service, you've come to the right place.
