Embossing, Strap Options

# ABOUT US

Nautical Manufacturing and Fulfillment was launched in 2017 to bring improved strategy to product manufacturing and fulfillment on a global scale. While many companies manage this work remotely and serve as brokers, Nautical facilitates high-quality services from sourcing to end user with boots on the ground. We put the best brainpower and global networking behind our clients; both those who use our services start-to-finish and those who meet us somewhere in the middle.

Whether you're interested in greater efficiency, higher ROI, or improved client service, you've come to the right place.

# INVEST IN PROFITABLE SUSTAINABILITY

We are proud to offer SOLMERA™ to help save the world from plastic pollution. SOLMERA leverages multiple energy sources such as low thermal temperature as well as UV. This hybrid approach ensures that SOLMERA products can become bio-available, providing a new way to address the persistence of plastics in our environment.

While most plastic alternatives can cost four times more than their standard plastic counter-parts, SOLMERA products provide the same value and barely raise the price.

**Contact Us**

to learn how to integrate SOLMERA with your order.

## SOLMERA Means Perishable Plastics

### Just Mix It In

An easy mix-in degradation catalyst requires no changes to the factory floor.

### Minimal Cost Increase

Tiny per-unit increase means environmental impact doesn't require a sacrifice to bottom line.

### Rapid Decomposition

Broken polymer chains are digested by bacteria, leaving behind only water and carbon—not microplastics.

### Use Alongside Recycling

Can go to a recycling center or a landfill—consumers don't need to change a single behavior.

### Thermally Activated

Uses thermally-activated decomposition and works even when buried in a landfill.

### Parity with Plastic

Retains all the capabilities of traditional plastic, without the negative environmental impact.
